Press Release

**Accelero Xtreme 2900 / 8800
The Ultimate Cooling Weapon for Hardcore Gamers**

(Pfäffikon/Switzerland, 19 February 2008) Swiss cooling solutions provider ARCTIC COOLING today announced the launch of the **Accelero Xtreme** series, which is specially designed for ATI HD 2900XT/Pro and nVIDIA GeForce 8800 Ultra/GTX/GT graphic cards as stock cooler replacement.

The **Accelero Xtreme** series features with 5 heatpipes, 107 fins and 3 PWM fans. Its radical optimized airflow design enables up to 240 watt heat dissipation, which guarantees outstanding cooling performance. **Accelero Xtreme** brings out the heat from GPU effectively, resulting in at least 20°C lower than the stock cooler. Together with the integrated memory cooling and voltage regulator cooling, **Accelero Xtreme** not only enhances the overclock potential, but also extends the service life of the card.

The three 80mm PWM fans operate in extreme silence and generate maximum airflow simultaneously, thanks to the promising low noise impeller as well as the patented fan holder that eliminates humming noise. With this outstanding low noise cooling technology, **Accelero Xtreme** brings enthusiasts and overclockers to the new level of non-disturbed gaming experience.

Accelero Xtreme will be available by mid February 2008. The MSRP of the **Accelero Xtreme 2900** is US\$49.90 and €34.90 (excl VAT). The MSRP of the **Accelero Xtreme 8800** is US\$47.90 and €32.90 (excl VAT).

Technical specification

Heatsink	256L x 88W x 21H mm
Weight	440g
Fan	252L x 100W x 32H mm
Fan speed	900 – 2000rpm via PWM
Air flow	63 CFM / 107 m3/h
Bearing	Fluid Dynamic Bearing
Service life	MTTF at 40°C: 400,000h
Thermal resistance	0.14 C/W

About ARCTIC COOLING

ARCTIC COOLING Switzerland AG is the trusted leader in providing low noise thermal cooling solutions for PC. Its diversified product lines including CPU cooler, VGA cooler, case fan, PC case and most recently, PSU. The innovative engineering team excels in systematic noise reduction, copper and aluminum heatsink development, customization of thermal solutions, low noise fan design, PC case and PSU elaboration. Headquartered in Pfäffikon, Switzerland, ARCTIC COOLING operates international offices in Hong Kong and the US providing local shipping, customer service and sales support for their regions.
