Unleash the Gaming Power

WCG 2006 Grand Finals Appoints PowerColor X1650 PRO as Official VGA Card

Top gamers from 70 countries battling it out with PowerColor X1650 PRO equipped gaming systems at the world's largest e-sports competition

Taipei, Taiwan – October 3, 2006 – Tul Corporation, a leading provider of ATI-based graphic cards, today announced the PowerColor X1650 PRO has been selected by the World Cyber Games (WCG) to be the official graphics card for the finals on October 18-22. 700 top gamers from 70 countries will be at the Autodromo Nazionale of Monza, in Italy to compete for titles in FIFA Soccer 06, Need for Speed: Most Wanted, StarCraft: Brood War, WarCraft III: Frozen Throne, Dawn of War: Winter Assault. Gaming systems throughout the tournament will be equipped with the PowerColor X1650 PRO.

PowerColor X1650 PRO comes with an unprecedented 600MHz core, running 1400MHz of 256MB 128-bit DDR3 memory; a category killer in the mainstream segment. It supports anti-aliasing with HDR, as only ATI-based chipsets can for stunning visual effects. Support for DirectX 9.0c, Open GL 2.0 and Shader Model 3.0 are also included. To bolster the performance, users can opt for the dual graphic card solution with CrossFire™.

“The PowerColor X1650 Pro has already proven to be an extremely popular card and with the endorsement of World Cyber Games, PowerColor graphics cards are proving to be the best choice for any gamer.” says Ted Chen, CEO of TUL Corporation.

About World Cyber Games

The World Cyber Games (WCG) is an annual global game culture festival that was founded in 2000 to promote global harmony through e-sports. With the slogan “Beyond the Game,” the World Cyber Games has truly developed into a global game phenomenon with arguably the largest prize amount at stake. The World Cyber Games prides itself on leading the “Digital Entertainment Culture.”
